

Bare Copper Conductors Single Conductor

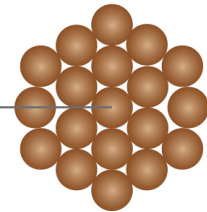

DESCRIPTION

Bare Copper Series E6000 is a single conductor, uninsulated, stranded bare copper, per ASTM B-8. The stranded configuration is constructed with a central wire surrounded by one or more layers of helically laid wires.

APPLICATIONS

- Stranded bare copper are suitable for distribution applications, uninsulated hookups, jumpers and grounds in electrical constructions.

19-Wire Stranded Conductor

Series E6000

CONSTRUCTION

CONDUCTOR Fully annealed Bare Copper Class B stranded

CONDUCTOR COUNT Single conductor

STANDARDS (Compliance)

PERFORMANCE ASTM B3
ASTM B8
ASTM B787
